

Restoration of the Dogu

National treasure “Dogu” (“*Jomon no Venus*”) had been buried underground over 5000 years. So the dogu was naturally, not intentionally broken by some reason, such as the pressure of the soil or the frost action.

After the designation, we carried out the careful restoration in order to keep it in the better condition and exhibit here.

The cracked parts were strengthened by removing and refitting.

Re-modelling the missing part
