

## “*Tsumetayama*” (Cold Mountain)

“*Tsumetayama*”, the one of the mountains which consists of Yatsugatake, has a source of obsidian in the slope. There is a group of several prehistoric sites called Shibukawa sites (cluster) below the source of obsidian in *Tsumetayama*. Huge number of pieces of obsidian which was caused by the prehistoric people’s stone tools making was found from the site, such as points for spear head, knives and exhausted cores, etc..

A imaginary reconstruction: how they used the source of obsidian in *Tsumetayama*.
